

FREE KIT · PRACTICAL AI

The Personal AI Starter Kit

10 AI workflows that give you your week back

Copy-paste workflows for planning, learning, writing and deciding, plus a one-page cheat sheet on how to talk to AI. Works with Claude, ChatGPT or Gemini.

Pranjal Pandey

IPRANJAL.COM

START HERE

AI won't run your life. It can run the boring parts of your week.

Most people use AI like a search engine with better manners: ask a question, get an answer, close the tab. The real gains come when you use the same few workflows every week, so the AI does the sorting, drafting and planning, and you keep the deciding.

This kit gives you ten of those workflows. Each one is a prompt you can copy, fill in and reuse. They work with Claude, ChatGPT or Gemini (and, most likely, whatever launches next Tuesday). You don't need to be technical. You need about 20 minutes and a slightly messy to-do list.

What's inside

How to talk to AI (cheat sheet)	03
Set up once: your About Me card	04
01 · Plan your week in 20 minutes	05
02 · Inbox to five	06
03 · Learn anything in an hour	07
04 · Meeting prep in 10 minutes	08
05 · The weekly review	09
06 · Decide without spiralling	10
07 · Write it better, in your voice	11
08 · Rehearse a hard conversation	12
09 · The monthly wins log	13
10 · Turn a goal into a game	14
Your weekly rhythm	15

How to use it

1. **Do pages 3 and 4 first.** Ten minutes of setup makes every prompt after it better.
2. **Start with two workflows,** not ten. Workflow 01 on Sunday, workflow 05 on Friday.
3. **Fill in the [brackets]** honestly. Messy notes are fine. AI is good at messy.
4. **Save the prompts you like** in a note so they're one paste away.
5. **Add one new workflow a week.** Keep the ones that stick. Ditch the rest without guilt.

The one rule: AI drafts, you decide. Nothing in this kit sends, buys or commits to anything without you reading it first.

CHEAT SHEET

How to talk to AI

Vague question, vague answer. Most "AI is useless" moments are really "I typed seven words" moments. Give it what you'd give a smart new colleague on their first day.

1 · WHO
Who you are, and who it should act as.

2 · WHAT
The exact task, in one sentence.

3 · WHY
Your goal, and who it's for.

4 · HOW
Format, length and tone.

5 · CHECK
"Ask me questions first."

Same request, two ways

WEAK "Help me plan my week."

STRONG "I'm a product manager with three deadlines this week and a dentist appointment on Wednesday. Help me plan Monday to Friday so the hardest work lands in my mornings. Show it as a table, keep each day to five items, and ask me up to three questions first if anything's unclear."

Power phrases worth stealing

- [ ] "Ask me up to 3 questions before you start."
- [ ] "Be honest, not nice."
- [ ] "Give me 3 options, then recommend one."
- [ ] "Make it half as long."
- [ ] "What am I missing?"
- [ ] "Use only the facts I gave you."
- [ ] "Tell me what you're unsure about."

Use it safely

Never paste: passwords, bank or card numbers, ID numbers, medical records, or confidential work data your employer hasn't approved for AI tools.

Check facts. AI can be confidently wrong, especially on numbers, recent news and niche topics.

You're the editor. Whatever you send is yours, so read it first.

SET UP ONCE

Your About Me card

Every time you start a chat, the AI meets you for the first time. Fix that once. Fill in this card, save it, and paste it before any workflow, or store it in your assistant's settings so it's always there.

YOUR CARD

FILL IT IN ONCE · UPDATE IT MONTHLY

```
About me (keep this in mind for everything I ask):
- I'm a [role or what you study], working in [field], based in [city / time zone].
- A normal week for me looks like: [e.g. 9–6 office job, gym three times, family dinner on Sundays].
- My goals right now: [1–3 goals, e.g. get promoted, learn Python, sleep before midnight].
- I do my best work: [e.g. mornings, in 45-minute sprints, with a deadline].
- How I like answers: [e.g. short, bullet points, direct, no motivational speeches].
- Please avoid: [e.g. 5am routines, jargon, telling me to "just be consistent"].
```

Where to keep it

- Most assistants have a place for standing instructions: look for *custom instructions*, *personalisation*, *memory* or *projects* in settings.
- No such setting? Keep it in a notes app and paste it at the top of a new chat.
- Update it on the first Sunday of each month. Goals change. So should the card.

Keep it light

Your card is context, not a diary. Skip health details, money specifics, addresses and anything you wouldn't put on a name badge at a conference. The AI doesn't need them to plan your Tuesday.

Quick test: after saving your card, ask *"Based on what you know about me, what's one thing I should stop doing this week?"* If the answer is generic, add more detail to the card.

WORKFLOW 01 · PLAN

Plan your week in 20 minutes

WHEN Sunday evening | TIME 20 min | YOU'LL NEED Calendar, to-do list

A week planned on Sunday beats a week discovered on Monday. This turns a messy brain-dump into a realistic plan that respects your energy, not just your calendar.

THE PROMPT

COPY · PASTE · FILL THE [BRACKETS]

```
Act as my weekly planning partner. Here's my week:
- Fixed commitments: [meetings, classes, family things, with days and times]
- Things I need to get done: [brain-dump everything; messy is fine]
- My energy: [e.g. sharpest in the morning, useless after 4pm]
- One thing that would make this week a win: [ ]

Please:
1. Pick my top 3 priorities and say why in one line each.
2. Put them in my best-energy slots, around my fixed commitments.
3. Batch the small stuff into 2–3 short blocks instead of scattering it.
4. Leave at least one empty buffer block. Something will go wrong.
5. Tell me honestly what to drop or postpone.

Show it as a simple day-by-day table. Ask me up to 3 questions first if
anything's unclear.
```

Make it yours

- Paste your About Me card first, so it already knows your rhythm.
- Copy the table straight into your calendar as time blocks.
- On Wednesday, paste the plan back with “here's what actually happened, re-plan Thursday and Friday.”

Watch out

AI doesn't know your commute takes an hour or that your manager loves surprise meetings. Overrule it freely. It's a draft, not a boss.

WORKFLOW 02 · CLEAR

Inbox to five

WHEN Daily, or whenever it piles up | TIME 10 min | YOU'LL NEED Unread messages or notes

The problem with a full inbox isn't the volume. It's that every message shouts with the same volume. This sorts the noise into five things you'll actually do.

THE PROMPT — COPY · PASTE · FILL THE [BRACKETS]

```
Below is a dump of my unread messages, notes and to-dos:
[paste them here, after removing passwords, account numbers and anything
confidential]

Sort everything into:
1. Do today: no more than 5 items, each starting with a verb.
2. Quick replies: draft a 1–2 line reply for each, friendly and brief.
3. Schedule for later: with a suggested day.
4. Safe to ignore or archive.

If something is unclear, put it under "Needs a decision from me" instead of
guessing.
```

Make it yours

- Works for WhatsApp backlogs, team-chat catch-ups and the notes-app graveyard.
- Paste 2–3 replies you've written before and add “match my tone”.
- Check your employer's rules before pasting work email into a personal AI account.

Watch out

Never let it send anything. You read, you edit, you send. A quick reply that's slightly wrong is worse than a slow one that's right.

WORKFLOW 03 · LEARN

Learn anything in an hour

WHEN When something new lands on your desk

TIME 45–60 min

YOU'LL NEED Curiosity, a notepad

AI is a patient tutor that never sighs when you ask the same thing twice. The trick is making it test you, so you actually learn instead of just nodding along.

THE PROMPT

COPY · PASTE · FILL THE [BRACKETS]

```
I want to understand [topic] well enough to [goal: explain it to my team /
pass a test / decide whether to use it].
What I already know: [ ].

Teach me in this order:
1. The big idea in 3 sentences, with an everyday analogy.
2. The 5 core concepts, one at a time. After each one, ask me a question and
wait for my answer before moving on.
3. The 3 most common misconceptions.
4. A 5-question quiz at the end. Mark my answers and explain anything I got
wrong.

Keep it plain. If I'm wrong, tell me directly. Don't just encourage me.
```

Make it yours

- Finish the Feynman way: “I'll explain it back in my own words. Point out the gaps.”
- Ask what to read next, then check those sources yourself.
- Answer every question *before* you peek. That's the “without fooling yourself” part.

Watch out

AI can be confidently wrong, especially on recent events, numbers and niche topics. For anything that matters (exams, money, health, work decisions), verify with a trusted source.

WORKFLOW 04 · PREPARE

Meeting prep in 10 minutes

WHEN Before any meeting that matters | TIME 10 min | YOU'LL NEED Agenda or email thread

Walking in prepared is the cheapest way to look senior. This works for team meetings, interviews, client calls, even a parent-teacher meeting.

THE PROMPT

COPY · PASTE · FILL THE [BRACKETS]

```
I have a meeting: [what it is, with whom, how long].
My goal: [what I want to walk out with].
Background: [paste the agenda, previous notes or the email thread, minus
anything confidential].

Give me:
1. The 3 points I must make, one line each.
2. The 3 best questions I should ask.
3. The 2 hardest questions they might ask me, with a short, honest answer
for each.
4. A one-sentence opening line.

Keep the whole thing to half a page.
```

Make it yours

- Interview? Add the job description and ask for likely questions plus the story you should tell for each.
- Afterwards, paste your rough notes and ask: “Turn this into a summary and action items with owners and dates.”
- Doctor's appointment? Use it to build your list of questions, not to get a diagnosis.

Watch out

Don't paste private details about other people that they wouldn't want shared. Prep notes about your colleague's “attitude problem” should probably stay in your head.

WORKFLOW 05 · REFLECT

The weekly review that actually happens

WHEN Friday afternoon | TIME 15 min | YOU'LL NEED Your Sunday plan

Everyone agrees weekly reviews are great. Almost nobody does them, because a blank page on a Friday is not inviting. This gives you a conversation instead of a blank page.

THE PROMPT

COPY · PASTE · FILL THE [BRACKETS]

```
Let's do my weekly review. Here's what happened:
- What I planned: [paste Sunday's plan]
- What actually happened: [quick notes]
- Wins (small ones count): [ ]
- What drained me: [ ]

Help me:
1. Spot one pattern from this week, good or bad.
2. Pick one thing to keep, one to stop and one to try next week.
3. List anything unfinished that still matters, and what I can let go of.

Be honest but kind. Keep it under 150 words. End with one question for me to
think about over the weekend.
```

Make it yours

- Same time every week. Put it in your calendar like a meeting with someone important (you).
- Save each review in one note. Once a month, ask: “What patterns do you see across these four reviews?”
- The output feeds straight into Sunday's Workflow 01.

Watch out

The point is reflection, not a performance review. If it's turning into self-criticism, tell it to be kinder. It will.

WORKFLOW 06 · DECIDE

Decide without spiralling

WHEN When you've been “thinking about it” for a week

TIME 20 min

YOU'LL NEED The options, and an honest mood

Big decisions rarely need more information. They need clearer criteria and someone to poke holes in your favourite option. AI is surprisingly good at both.

THE PROMPT

COPY · PASTE · FILL THE [BRACKETS]

```
I'm trying to decide: [the decision].
Options: [A, B, C].
What matters most to me: [e.g. money, time with family, learning, low risk].
Deadline: [when I must decide].

Please:
1. Ask me up to 5 questions to understand what I really care about.
2. Compare the options in a table against my criteria.
3. Run a pre-mortem: for each option, imagine it's a year later and it went
badly. Why?
4. Tell me which option looks strongest, and what would change your mind.

Don't decide for me. Help me see clearly.
```

Make it yours

- Try: “Argue the strongest case for the option I'm leaning against.”
- Add the 10/10/10 test: how will I feel about this in 10 minutes, 10 months and 10 years?
- Sleep on the result. If you feel relief, that's data. If you feel dread, that's data too.

Watch out

For medical, legal or financial decisions, use this to prepare your questions, then talk to a qualified human. AI is a thinking partner here, not an adviser.

WORKFLOW 07 · WRITE

Write it better, in your voice

WHEN Any email, message or post that matters | TIME 10 min | YOU'LL NEED Rough notes

Staring at a blank email is the worst part of writing. Let AI take the first draft, then make it sound like you. Polish, don't outsource.

THE PROMPT

COPY · PASTE · FILL THE [BRACKETS]

```
Help me write a [email / message / LinkedIn post / cover letter] to [who].
What I want to say: [rough notes, bullet points or a rambling voice-note
transcript; all fine].
My goal: [what I want them to do or feel].
Tone: [e.g. warm and direct, no corporate fluff].
Here are two things I've written before, so you get my voice: [paste them].

Give me one draft under [X] words, then 3 quick suggestions to make it
sharper.
Don't add facts or promises I didn't give you.
```

Make it yours

- Follow-ups that work: “Half as long.” “Make the first line impossible to ignore.” “Less formal.”
- Read it out loud before you send it. If you wouldn't say it, rewrite it.
- Keep your two voice samples in your notes so they're always ready to paste.

Watch out

People can smell a robot paragraph from a distance. Edit until it sounds like you, and never send a claim you can't back up.

Rehearse a hard conversation

WHEN Before asking, negotiating or giving feedback

TIME 15–20 min

YOU'LL NEED The situation, honestly described

Asking for a raise, giving feedback, saying no. Hard conversations go better the second time. AI lets the first time happen in private.

THE PROMPT — COPY · PASTE · FILL THE [BRACKETS]

```
I need to have a difficult conversation: [e.g. asking for a raise / giving
feedback to a colleague / saying no to a friend / negotiating rent].
The other person: [their role, what they care about, how they usually
react].
What I want: [the outcome].

Let's role-play. You play them realistically, including pushback. Don't make
it easy for me.
After 5–6 exchanges, step out of the role and give me feedback: what landed,
what didn't, and a better way to phrase my weakest moment.
```

Make it yours

- Run it twice. The second round is where the calm shows up.
- Try the hard mode: “Now play them on a bad day.”
- Finish by writing the first two sentences you'll actually say, and nothing more.

Watch out

Real people are less predictable than a role-play. Rehearsal builds calm and clarity, not a script to recite word for word.

WORKFLOW 09 · GROW

The monthly wins log

WHEN Last Friday of the month | TIME 15 min | YOU'LL NEED Notes, messages, your calendar

When appraisal season or a job search arrives, nobody remembers what they did in March. Fifteen minutes a month fixes that, and turns your work into CV-ready proof.

THE PROMPT

COPY · PASTE · FILL THE [BRACKETS]

```
Here are my notes from this month: [projects, problems I fixed, people I
helped, things I learned, numbers if I have them].

1. Turn them into 3–5 achievement bullets in the format "Did X, which led to
Y". Use only the facts I gave you. Where I didn't give a result, write [add
result?] instead of inventing one.
2. Suggest which bullet belongs on my CV or LinkedIn.
3. Name one skill this month shows I'm building, and one gap I could close
next month.
```

Make it yours

- Keep every month's output in one running “wins” doc. In a year, you'll have a goldmine.
- Moving into AI? Add: “Suggest one small portfolio project that builds on this month's work.”
- Scroll your calendar and sent folder first. You did more than you think.

Watch out

Never let it inflate numbers or titles. Recruiters can tell, and so can you. Honest and specific beats impressive and vague.

Turn a goal into a game

WHEN When a goal keeps slipping

TIME 20 min to set up

YOU'LL NEED One goal, a date, some honesty

Games keep us coming back with small wins, visible progress and the occasional boss fight. Your goals can borrow the same tricks. Think of it as an RPG where the main character finally goes to the gym.

THE PROMPT

COPY · PASTE · FILL THE [BRACKETS]

```
Help me turn a goal into a game.
My goal: [e.g. run 5K, finish an online course, cook 10 new dishes] by
[date].
Time I have each week: [ ].

Design it like a simple RPG:
1. Break the goal into 3 levels, each with 3–5 quests (small, specific
tasks).
2. Give each quest XP points based on effort.
3. Add one daily streak habit worth 10 XP.
4. Set a reward at each level: cheap or free things I'd actually enjoy.
5. Add a "boss fight" at the end of each level: a small test that proves
I've levelled up.

Show it as a table I can track. Make it fun, but realistic: I have a life.
```

Make it yours

- Each Sunday, paste your XP log and ask your “game master” for next week's quests.
- Missed a few days? Ask for a comeback quest, not a guilt trip.
- Want the full system? *Level Up: Gamify Your Life with AI* is coming soon.

Watch out

If the game starts feeling like a chore, shrink the quests. The point is momentum, not a perfect streak.

PUT IT TOGETHER

Your weekly rhythm

Ten workflows is a menu, not a meal plan. Here's how they fit into a normal week. Roughly an hour of AI time, in return for a calmer week.

WHEN	WORKFLOW	TIME
Sunday evening	01 Plan your week (paste Friday's review in)	20 min
Most mornings	02 Inbox to five	10 min
Before meetings that matter	04 Meeting prep	10 min
Friday afternoon	05 Weekly review	15 min
Last Friday of the month	09 Monthly wins log	15 min
Whenever you need them	03 Learn · 06 Decide · 07 Write · 08 Rehearse	10–60 min
Ongoing	10 Your goal game (check in on Sundays)	5 min

Your first week

- [ ] Fill in the About Me card (page 4)
- [ ] Save the cheat sheet somewhere you'll see it
- [ ] Sunday: run Workflow 01
- [ ] Midweek: try one “whenever” workflow
- [ ] Friday: run Workflow 05
- [ ] Save the prompts that worked in one note

If it stops sticking

That's normal. Drop back to just two workflows, 01 and 05, for a couple of weeks. Plan on Sunday, review on Friday. Everything else is a bonus.

Make it a habit: attach each workflow to something you already do. Sunday plan with your evening tea. Friday review before you shut the laptop.

NEXT STEPS

Want to go further?

I'm Pranjal. I started building software at 15 and founded my first company at 19. Today I build AI systems for a living: I'm the founder of Taskflo AI and a PhD researcher in multi-agent systems at IIT Jodhpur. These are workflows I use myself, minus the ones that only work at 2am.

AI Career & Portfolio Kickstart · 60 min
